

**Did you go to University? If so, where?**

Yeah, I was at Brunel University in Uxbridge in the early eighties, where I studied Psychology. I also used to do a Tuesday evening show (5pm-7pm) on University Radio Brunel, where I started my career in broadcasting!

**What other stations have you previously worked at?**

Radio Luxemburg 1989, Greater London Radio 1990, Virgin MegaStore In-Shop Radio 1991-1993, Virgin Radio 1993-1995, Talk Radio 1996

**Have you had any other jobs?**

I've done everything imaginable for money (except that)!

**Is there anyone in the Radio business who you admire?**

Kenny Everett was definately the best radio talent this country has ever seen. No other DJ even comes close. Also there's a guy in America called Neil Rogers who is excellent, and he's basically the one who inspired me to do the show I do over here now.

**Your favourite "Star" that called the show:**

Got to be Mrs Hull

**Out of all the shows you have done, which was your favourite?**

Late night phones on Virgin

**Have you got yourself a female yet?**

There will never be another like mummy!

**How would you describe your career to date?**

I consider myself very lucky to have had the opportunities I've had. It's just a shame that I'm not doing the phone-in talk show any more, I worked for 5 years to get that talk show, it's all I've ever wanted to do, and it's still all I want to do. I did apply for a job at Talk Radio (as I have applied to just about every radio station in this country at some point in my life), and I was approached by the station after my speech to the radio academy. I have no idea whether they'll ask me back after my 3 week trial there, but I hope so.

**What do you think about having your own InterNet site?**

I don't really know anything about the Internet. I've always hated computers, although I did recently visit a cybercafe in London and experienced it first hand. In general the internet seems to me to be incredibly boring, I mean you search for a word, and it gives you a list of 100,000 choices and where do you want to start! I very impressed with the site you've set up about me though. It's nice to know that the computer nuts like me, for they shall eventually rule the world!

**And do you have a final word for all your fans on the Net?**

SHOULDN'T YOU ALL BE MAKING BLIND DATES  
AND PRINTING OFF SOME PORNO LIKE THEY  
SAY YOU DO IN THE RABID TABLOIDS?

GET <sup>AND</sup>  
A LIFE
